ADJUSTABLE VENT

VNM

These technical specifications state a row of manufactured sizes and models of rectangular comfort, one-row and two-row vents with R1, R2 and R3 regulation (further only vents) VNM. It is valid for manufacture, designing, ordering, delivery, assembly and operation.

II. GENERAL INFORMATION

1. Description

- 1.1.** Vents are end air-conditioning elements used to distribute air in air-conditioned, ventilated and heated rooms.
- 1.2.** Comfort vents made of aluminium sections are supplied with concealed fastening fixed by spring clips or with screwed fastening.
- They consist of rectangular frame which holds either one row or two rows of rotating blades (one- or two-row vents).
- Vents can be equipped with regulation R1, R2, R3 or R5, R6 with fixing frame UR eventually with separate fixing frame UR.
- The tightness of vents is ensured along the perimeter by means of sealing.
- 1.3.** Vents are designed for macroclimatic areas with mild climate according to EN 60 721-3-3 zm.A2.
- 1.4.** Vents are suitable for systems without abrasive, chemical and adhesive particles.
- 1.5.** Temperature in the place of installation is permitted to range from - 20°C to + 70°C.
- 1.6.** If is not noticed other way, all dimensions and weight are in millimeters and kilograms.

2. Design

- 2.1.** Vents are supplied, according to the number of rows of rotating blades, as one- or two-row vents. Blades are pitched at 20 mm.
- One-row vents are installed primarily for air outlet and two-row vents are installed primarily for air inlet.
- Vents can be equipped with R1 type regulation through counter-rotating blades, R2 type regulation through tilting arm of directing blades, R3 type regulation through fixed and adjustable regulation strip, parallel to vent frame, R5 type regulation through large format tilting blade and R6 type regulation through fixed and adjustable regulation strip, oblique to vent frame.
- Regulation R2 is intended for air inlet, regulations R1, R3, R5 and R6 are intended for air inlet and air outlet. Vents are installed by using of regulations R1, R2 and R3 or fixing frame UR.
- 2.2.** If is requested installation in gypsum constructions it's to be mentioned in a order (in this case are used adapted regulations R1, R2 and R3 or fixing frame UR for installation in the gypsum constructions).
- 2.3.** Vents are supplied with concealed fastening or screwed fastening.
- 2.4.** Vents with concealed fastening are installed by using fixing frame (UR or fixing frame UR for installation in the gypsum constructions), frame of regulation or an atypical frame furnished with an edge for gripping the spring clips (see detail of leaf of fixation frame).
- 2.5.** Vents with screwed fastening are installed by using fixing frame (UR or fixing frame UR for installation in the gypsum constructions) or frame of regulation. It's possible direct mounting to the wall without fixing frame or regulation.

4. Installation and location

4.1. Vents are intended for installation in piping, partition walls and lower ceilings by using fixing frame UR or regulation R1, R2 or R3. For screwed fastening is possible direct mounting without fixing frame or regulation.

4.2. Vents Installation

6. Calculation and determination values

Fig. 34 Air flow without affecting the ceiling

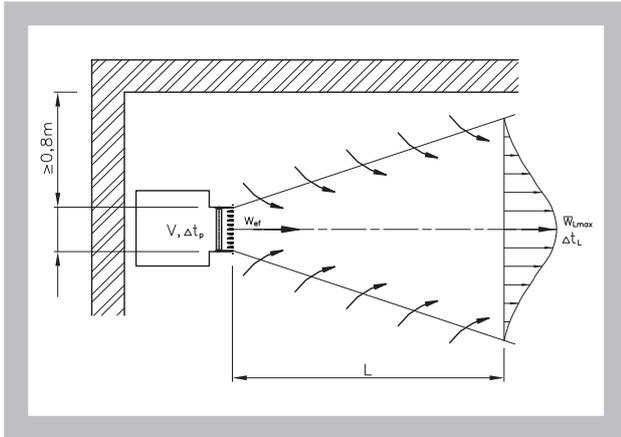

Fig. 35 Air flow with affecting the ceiling

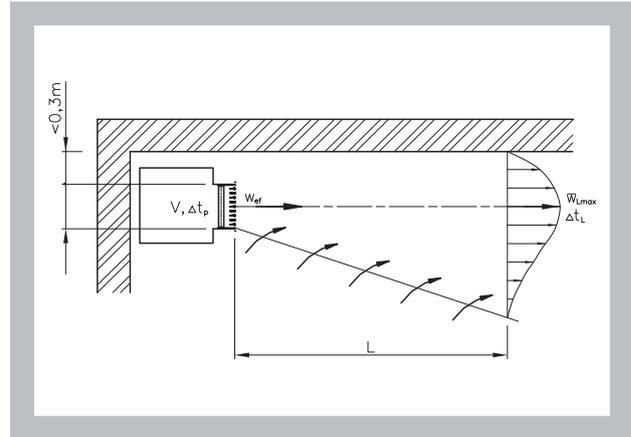

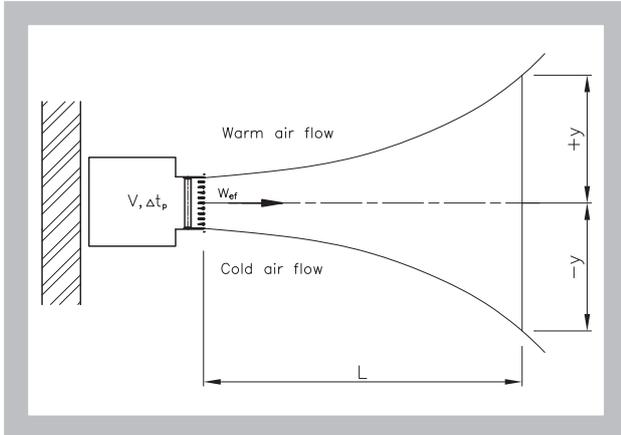

Fig. 36 Deflection of air flow - non isothermal air flow

Effective velocity w_{ef}

$$w_{ef} [m.s^{-1}] = (\dot{V} [m^3.h^{-1}] / 3600) / S_{ef} [m^2]$$

- \dot{V} [m³.h⁻¹] volumetric air flow for one vent
- Δp_c [Pa] total pressure loss at $\rho = 1,2 \text{ kg.m}^{-3}$
- w_{ef} [m.s⁻¹] effective air velocity in vent
- L_{WA} [dB(A)] acoustic power level
- S_{ef} [m²] effective vent area
- t [m] flow length
- w_L [m.s⁻¹] air flow velocity in L distance L
- t_p [K] difference between inlet air temperature and room air temperature
- Δt_L [K] difference between room air temperature and the air temperature in flow axis in L distance
- y [m] deflection of air flow axis

7. Ventilation values

7.1. Acoustic powers and pressure losses

Diagram 7.1.1. VNM with regulation R1 - inlet

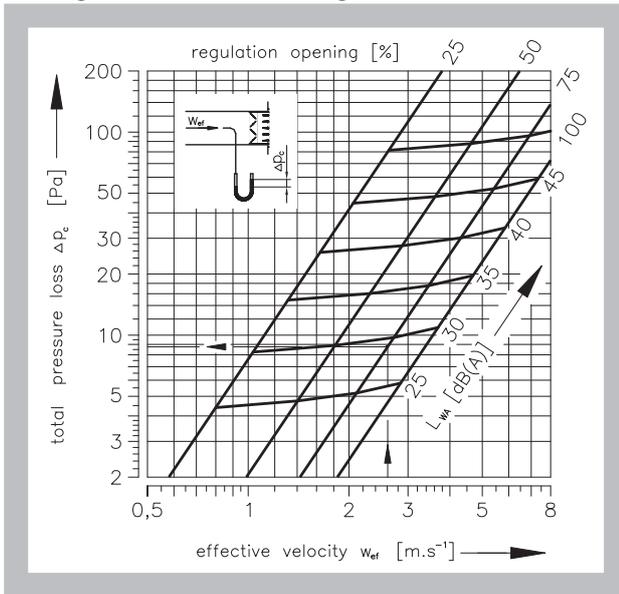

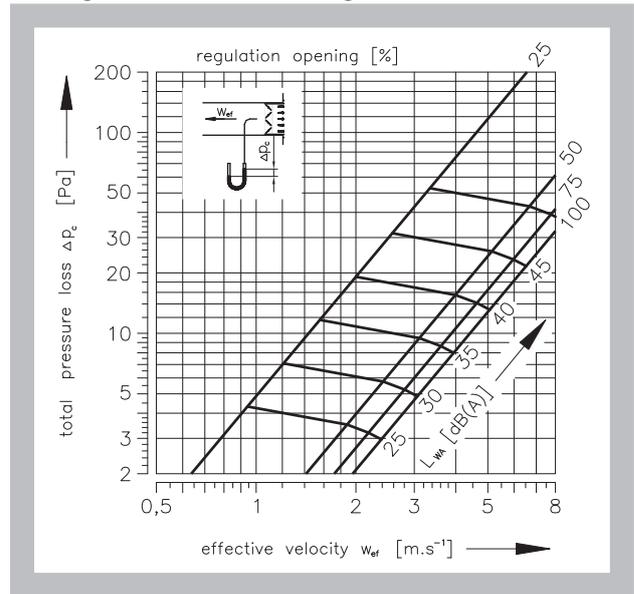

Diagram 7.1.2. VNM with regulation R1 - outlet

The same values as for 100% regulation opening apply to grilles without regulation.

7.2. Air flow velocity, flow length and deflection of air flow axis

Diagram 7.2.1. Air flow velocity and flow length - isotherm air flow, without affecting the ceiling

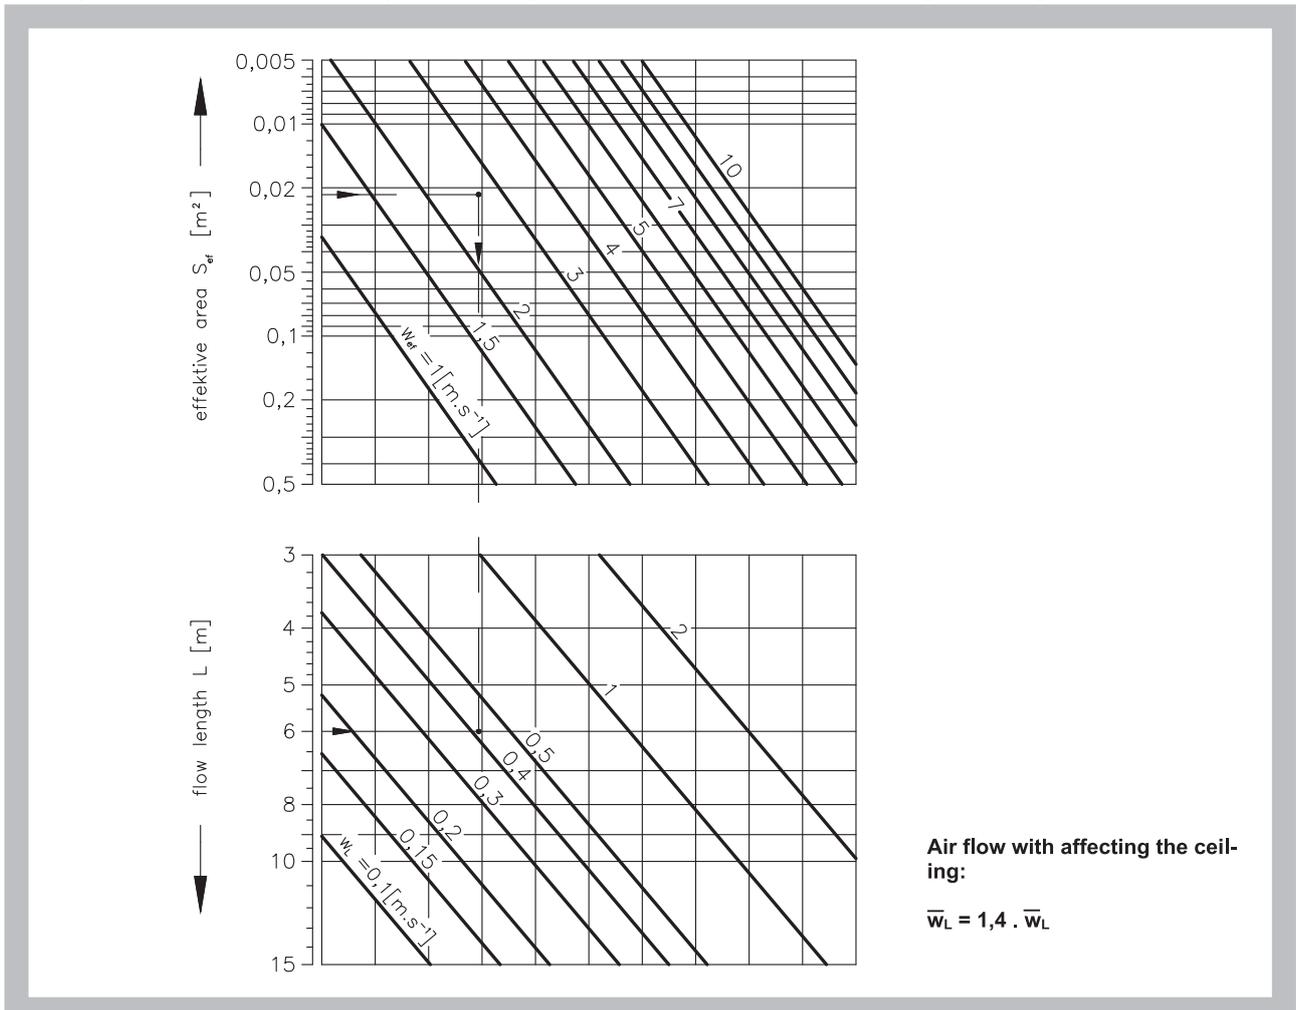

Diagram 7.2.2. Deflection of air flow axis

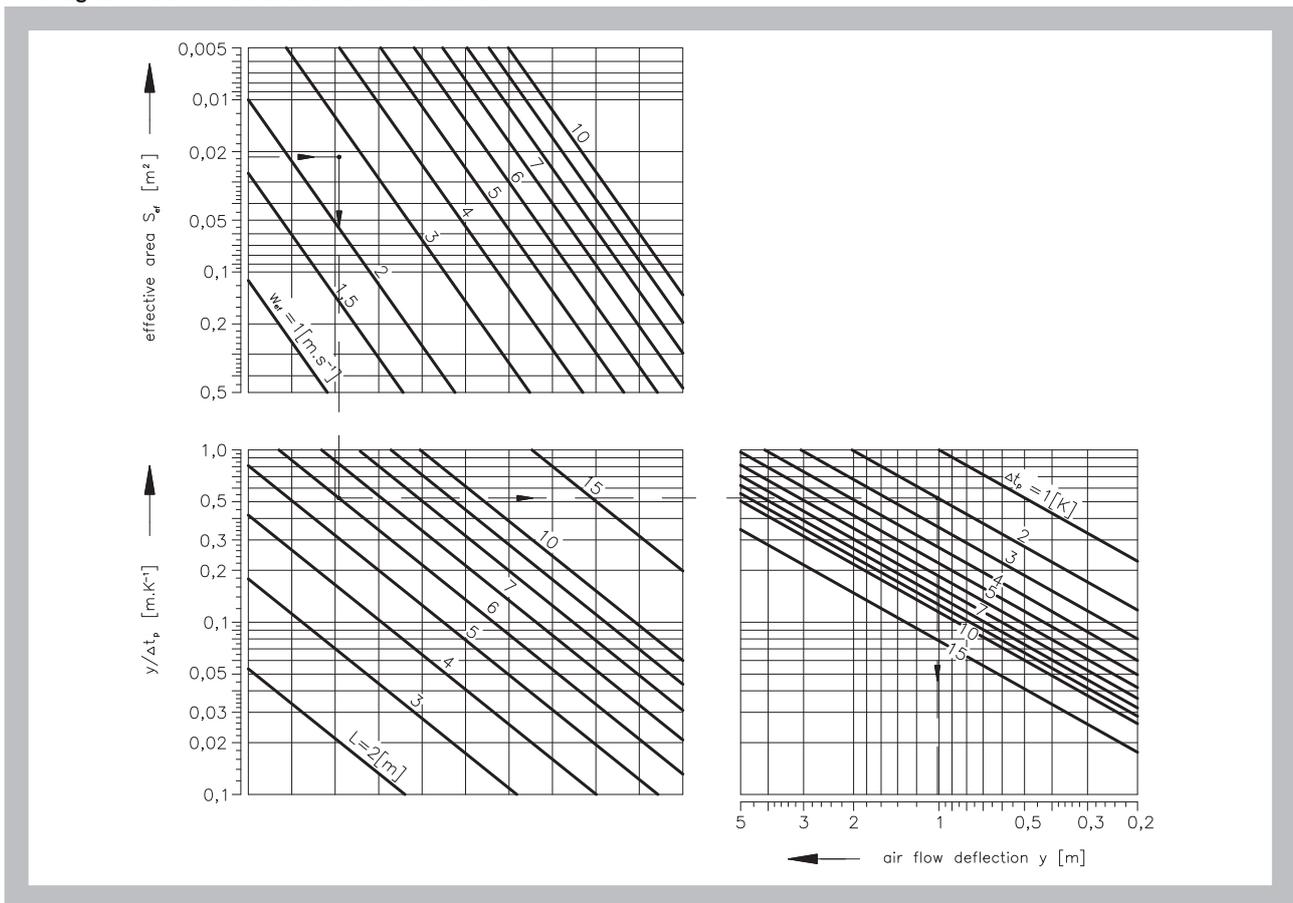

Fig. 37 Example

Given data: Vent VNM 2 280 x 140 with regulation R1 for air inlet (regulation opening 75%), without affecting the ceiling

$$\dot{V} = 200 \text{ m}^3 \cdot \text{h}^{-1}$$

$$L = 6 \text{ m}$$

$$\Delta t_p = 2 \text{ K}$$

Tab. 5.1.2. : $S_{ef} = 0,0214 \text{ m}^2$

Calculation: $W_{ef} = (\dot{V} / 3600) / S_{ef} = (200 / 3600) / 0,0214 = 2,6 \text{ m} \cdot \text{s}^{-1}$

Diagram 7.1.1. : $\Delta p_c = 8,7 \text{ Pa}$

$$L_{WA} = 29 \text{ dB(A)}$$

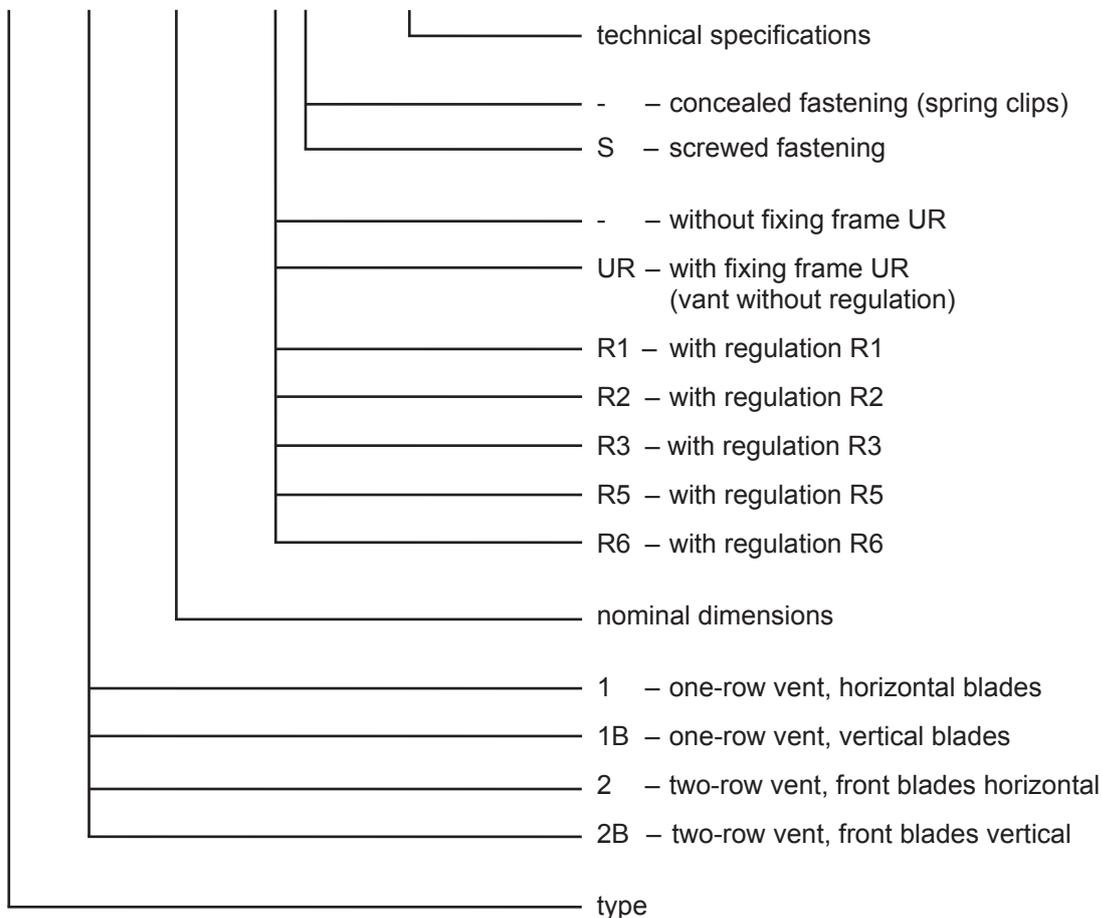

Diagram 7.2.1. : $\bar{w}_L = 0,4 \text{ m} \cdot \text{s}^{-1}$

Diagram 7.2.2. : $y = \text{cca } 1 \text{ m}$

IV. ORDERING INFORMATION

8. Ordering key

VNM 2A 280x140 R1/S TPM 015/01

V. MATERIAL, FINISHING

9. Material

- 9.1. The components of vents are made of drawn aluminium sections. Section surfaces are eloxal coated.
- 9.2. Fixing frames with fixtures are made of galvanized sheet. Spring clips are made of spring steel with galvanized surface.
- 9.3. The sealing along the grille perimeter is made of plastic foam self-adhesive tape.

VI. INSTALATION

10. Assembly and disassembly

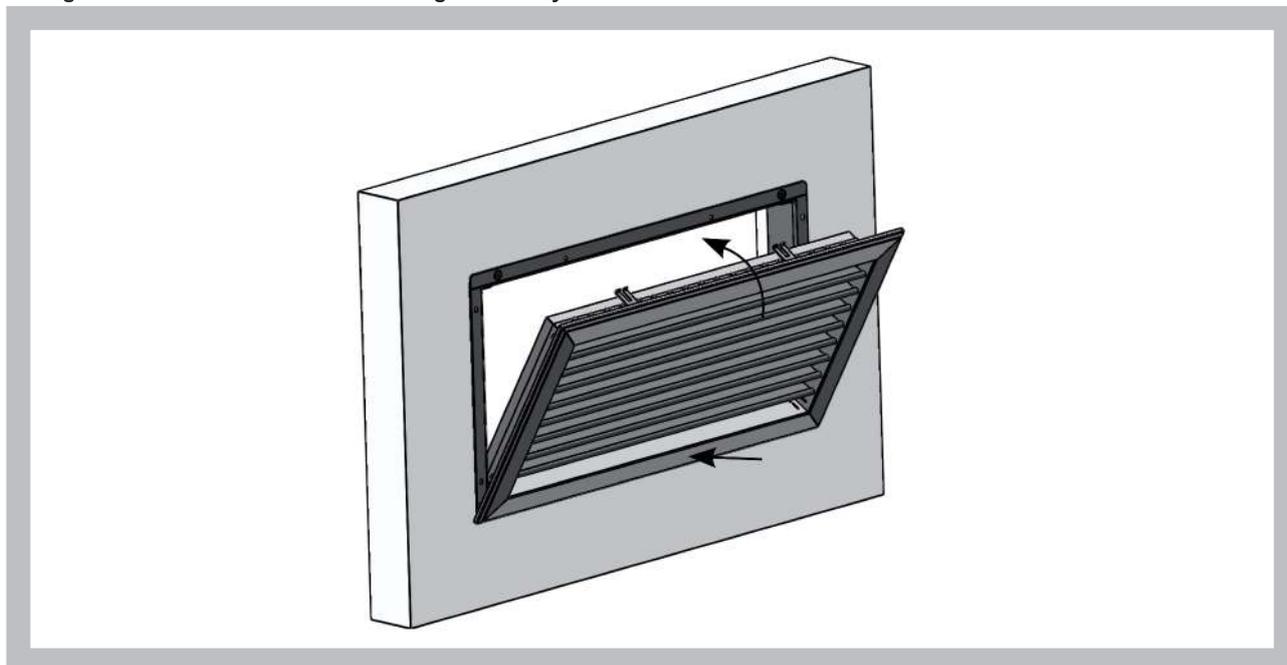

10.1. Vents with concealed fastening - assembly

Delivery components of the vents are the spring clips (up to an vent width of 750 mm, 4 units; more than 750 mm, 8 units) and the seal.

- 1) Install the regulation R1, R2 or R3 or fixation frame UR or if required, the atyFigal frame furnished with an edge for gripping the spring clips (see page 12 - detail of leaf on fixation frame)
- 2) If a regulation is installed, adjust the flow of air through the vent.
- 3) Set the position of the front row of the vent's blades.

- 4) Place the vent into the body of the regulation or the fixation frame, press the spring clips and push in the vent. The tongues of the spring clips grip onto the edge of the frame.

Fig. 38 Vents with concealed fastening - assembly

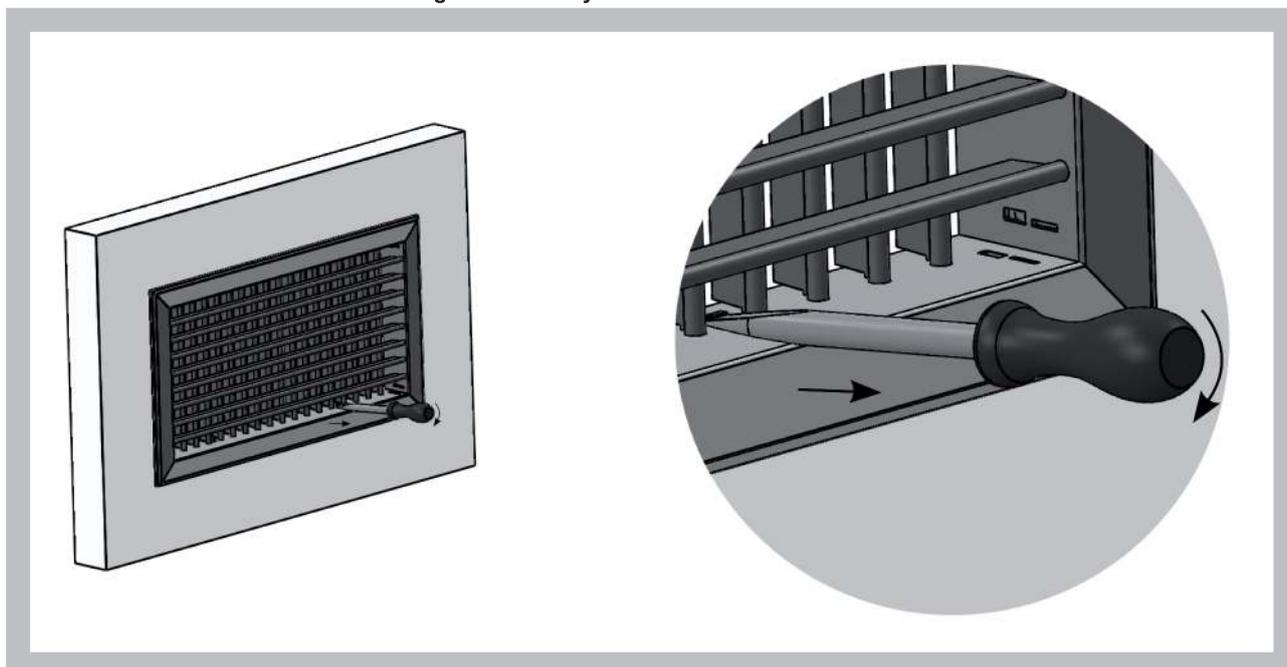

10.2. Vents with screwed fastening - assembly

Delivery components of the vents are screws, covers and seal.

- 1) Install the regulation R1,R2 or R3 or the fixation frame UR.
- 2) If a regulation is installed, adjust the flow of air through the vent.
- 3) Set the position of the front row of the vent's blades.
- 4) Place the vent into the fixation frame and secure the screws.

10.3. Vents with concealed fastening - disassembly

Obr. 39 Vents with concealed fastening - disassembly

- 1) With a screwdriver (through the openings between the lamellas of the vent), press beyond the jutting-out the tongues of the spring clips from the edge of the frame.
- 2) Take out the grille.

10.4. Vents with screwed fastening - disassembly

- 1) Unscrew the screws.
- 2) Take out the vent.

VII. PACKING, TRANSPORTATION, TAKE-OVER, STORAGE AND GUARANTEE

11. Logistic terms

- 11.1. Vents are supplied packed in shrinking foil. While transported and stored they must be protected against mechanical damage and weather conditions.
- 11.2. If no method of take-over is mentioned in the order, handing the goods over to the carrier will be considered as a take-over.
- 11.3. Vents have to be stored in closed premises, in the environment without aggressive steams, gases and dusts. Temperature range have to be from -5 to +40°C and relative humidity max. 80%.

12. Guarantee

- 12.1. The manufacturer provides a guarantee to the adjustable vents for the period of 24 months from the date of shipment.
